Shirley BC V9Z 1G6

October 18, 2026

Dear Secretary to the Comptroller,

On behalf of Sheringham Water Works, we are requesting approval of the proposed water rate increases to support the ongoing operation, maintenance and financial stability of our water system. Our current rates no longer provide sufficient revenue to fund significant infrastructure work. The proposed increases will help cover rising operating costs and the replacement of aging distribution pipes.

As the new water storage tank comes into service, we must plan for maintenance and replacement of the existing distribution lines. The anticipated increase in system pressure may place additional demands on aging pipes, making it essential to have funds available for repairs and planned line replacement. While our RRTF is being rebuilt, we will have no reserve funds available to meet these needs.

Thank you for considering our application. We would be pleased to provide any additional information required to support your review.

.
